

How to Put Hair into a Bun for Nutcracker

1. Spritz hair with water, so that it is slightly damp (this helps to control the “wispies”)
2. Pull hair into a high ponytail. This should be located at the point where the scalp begins to curve downwards.
3. If hair is thick, divide ponytail into two sections.
4. Twist first section (or whole ponytail for thinner hair) and use bobbypins to pin into place around the base of the ponytail
5. Twist second section and use bobbypins to pin into place around first section.
6. Use hairnet to secure – twist hairnet around bun like you would a ponytail holder, and pin into place with bobbypins.
7. Spray with hairspray to set, smoothing back any wispy sections from the face or underneath the bun.
